# Subject Index

**A**

Ada and Pseudocode Programs, 285
Ada, Measuring for Software Development in the SEL, 149
Ada, Object-Oriented Design in, 95
Ada Simulator Design, Compared to Fortran, 95
Algorithm Development, Difficulties in Learning, 295
Array-Theoretic Computation, Design of a Processor for, 67

**C**

Computer-Aided Software Engineering (CASE), 109
Concurrent System (COSY) Path-Expression Formalism, 183
Concurrent Systems, Finite-State, 251

**D**

DARTS/DA, 81
Data Collection, 137
Dataflow Environment, 243
Debugging Semantic Errors, Effects of Programming Experience in, 197
Dependency Analysis, 3
Diffusion Theory, 161
Distributed File System, Performance Evaluation of, 271
Distributed Programs, 29
Distributed Real-Time Applications, a Software Design Method for, 81

**E**

Embedded Behavior Pattern (EBP) Languages, 109

**F**

Finite-State Concurrent Systems, 251
Fortran Simulator Design, Compared to Ada, 95

**G**

Graphics-Based Software Modeling Languages, 109

**H**

High-Order Language, 1

**I**

INFORM, 169
Instructional Environment to Improve Introductory Programming Courses, 295
Interactive Syntax-Directed Editor for Mathematical Formulae (INFORM), 169
International Cooperation for Software Development, 303

**L**

L-Machine, 209
LISP Architectures, 67
Locality in Dataflow Environments, 243
Logic-Oriented Object Data Base (LOOD), 19

**M**

Maintenance Assistant, 3
Mathematical Formulae, Processing of, 169
Memory Hierarchies in Dataflow Environments, 243
More's Array Theory, 67
Multiple Operating Systems, Integration with Personal Computer, 41
Multiprocessors, Automating Resource Allocation for, 51

**N**

N-Modular Redundancy (NMR), 183

**O**

Object-Oriented Methodologies, 95
Overloads, Reliability of Distributed Programs Under, 29

**P**

Partial Metrics System, 285
Pascal and Problem Solving, 295
Performance Evaluation of a Distributed File System, 271
Personal Computer, Extension and Integration, 41
Portable Operating Systems, 41
Problem Solving, 77
Program Change Analysis, 3
Program Restructuring in Dataflow Environments, 243
Programming Experience and Debugging Abilities, 197
Prolog, 209
Pseudocode Programs, the Metrics-Driven Design of, 285

**Q**

Quantifying Software Design, 129

**R**

Reliability-Assurance Techniques, 191
Replicated Systems, Synchronizing Events in, 183
Resource Allocation, Automating for Multiprocessors, 51
Reverse Engineering, 3
RISC Architectures, 67

**S**

Semantic Data Bases, 19
Sequential Environments, 243
Software Development, International Perspective of, 303
Software Documentation Formats, Experimental Evaluation of, 167
Software Engineering Laboratory (SEL), 137
Software Errors, 241
Software Measurement in the SEL, 137
Software Methods, 79, 81, 95, 109, 129, 137, 149, 161, 167
Sorting Algorithms, Stack-Based, 225
Stack-Based Sorting Algorithms, 225

**T**

Technology Maturation, 167

**U**

UTHL-Prolog System, 209

# Author Index

Agresti, W. W., 149
Ammar, R. A., 225

Bailey, J., 167
Bayer, J., 161
Boehm-Davis, D. A., 167
Bulgren, W. G., 295

Collofello, J. S., 191
Cook, C. R., 197
Curtis, B., 167

Farrell, C., 303
Fujii, M., 129

Gaimon, C., 51
Glass, R. L., 1, 77, 167, 241
Gomaa, H., 81

Hać, A., 271
Halatsis, C., 209
Heeman, F. C., 169

Jenkins, M. A., 67

Koutny, M., 183
Kruesi-Bailey, E., 167
Kudo, H., 129

Long, A. N., 243
Lu, M., 303

Mancini, L. V., 183
McCrosky, C., 67
McGarry, F. E., 137, 149
Melone, N., 161

Nanja, M., 197

Oman, P. W., 197

Reynolds, R. G., 285
Rotenstreich, S., 29

Schwan, K., 51
Seidewitz, E., 95
Sheppard, S. B., 167
Sheu, P. C., 19
Shieh, C. K., 41
Stavely, A. M., 251
Sugiyama, Y., 129

Thebaut, S. M., 3
Thoreson, S. A., 243
Titus, G. B., 251
Torii, K., 129
Tseng, L. M., 41

Valett, J. D., 137
van Egmond, S., 169
van Vliet, J. C., 169
Vlahavas, J., 209
